

#### RICE DISTRIBUTION:

In 2013, in the wake of the disastrous typhoon Haiyan, food was scarce in the home town of the founder of COCO NUTRIFY. People were so hungry that she took a 3-hour boat ride to a nearby town and back to buy sacks of rice. She brought them back, divided the rice into family-size portions, and handed them out until the rice was gone. This video was taken during the distribution of the rice.
